Restaurant lookup for Masters

201 listings | FSA register checked 11 November 2026

Where to find the three restaurant answers on the day-trip risk-assessment form: name and location, allergen evidence, and food hygiene rating.

1 Restaurant and location	Trading name and address. Italic notes give the operator, the host venue or a second FSA record.
2 Allergen evidence	P: the venue or brand publishes an allergen guide or policy (linked). S: the venue says to ask staff, or marks diets only. U: nothing published online. In each case the note says what the venue publishes and what it says about its kitchen.
3 FSA hygiene rating	Food Standards Agency rating and inspection date, linked to the record. The form needs a 5; anything else is flagged in red.
